

## **Student Research Skill Module**

In this skill module we will discuss student research. A few of the questions I will address are listed below:

- What are the benefits of becoming a student researcher?
- What resources are available to me on campus to pursue my research goals?
- Can I join a lab even though I don't have any background in that field of study?
- How do I join a lab?
- What will be expected of me?

This module will also involve learning how to make a scientific poster using Adobe Illustrator---an essential skill for presenting at the UT Undergraduate Research Forum this upcoming Spring!

At the end of this module, you will be expected to turn in a 500 word essay on your research goals and what methods you will use to accomplish them.
